Building Specifications

| Total Square Feet: | North Building: 76,838 SF South Building: 99,027 SF |
|--|---|
| Dimensions: | North Building: 150 to 175' deep (varies - see plan) South Building: 210' deep by 442' wide East/West |
| Column Spacing: | North Building: 40' x 50' and 32' x 50' South Building: 40' x 52' + speed & rail bays 41' x 52' + east/west bays are 53' (see plan) |
| Structure: | Brick and block with structural steel columns/roof |
| Ceiling Height: | Clear height from north wall (rear) to south wall (front) and at each column in between is: 22'4", 22', 21'8", 21'4", 21'1" |
| | Height to the underside of the roof deck, measured same as above from north to south is: 25', 24'7", 24'3", 23'11", 23'9" |
| Loading: | North Building: 11 dock-high doors. Doors are $10' \times 10'$. Two drive-in ramps, one is $12' \times 14'$ and one is $14' \times 14'$. All dock doors have 30,000 pound edge of dock levelers. Can add drive-in door on East end. |
| | South Building: 15 dock-high doors and all are 10^{\prime} x 10^{\prime} , one is van-high. One - 12^{\prime} x 14^{\prime} drive-in ramp and one is a forklift ramp. Most docks have pit or edge of dock levelers and shelters. Can add drive-in door on East end. |
| Trailer Side Loading/ Fenced Storage: | Available via paved former rail area between north and south buildings - both buildings. |
| Office/Showroom: | North Building: 3,222 SF to 6,297 SF South Building: 2,271 SF to 9,450 SF Unit #830: S. St. Paul - Mezzanine above east end of office for light storage |
| Floor Type: | Concrete - 5" with 6x6 #6 wire mesh over crushed rock fill |
| Lighting Type: | North Building: T-5 with motion sensors - Augmented by Clerestory Windows South Building: LED and T-5 with motion sensors - Augmented by Sky Lights Unit #640: (42,210 SF) LED with motion sensors Unit #830: S. St. Paul (17,010 SF) LED with motion sensors |

Building Specifications - Continued

North Building:

Occupancy Group Type: Warehouse = Ordinary Hazard Group I/II

> Office Area = Not Sprinklered (Light Hazard) Design Density of = .20 over 2,174 square feet

Head Spacing of 120 SqFt or 10' x 12' spacing

Water Pressure Flow of: Static Pressure = 103 psi Sprinkler Type:

Residual Press. = 98 psi

GPM Flow = 1124 gallons per minute

This particular type of system is considered a "Pipe Scheduled" system and was utilized prior to the mainstream use of "Hydraulically Calculated" systems. The numbers in the hydraulic calculation are based on measurements and

dimensions taken on-site and water flow test data taken.

Exterior Lighting: Provided over all dock loading areas, parking lots and rear alley/loading

Unit #640 & 830: "Big Ass Fans" brand fans installed as well as gate on north Ventilation:

side, former rail dock openings to provide for cross-dock ventilation

HVAC in Warehouse: Unit heaters - FAG

North Building: Has two transformers with 5,000Kva of available power; twin

4,000 amps, 480 volt services.

South Building: The South building's main distribution panel is a 600 amp,

120/208V service split between 3 meters/spaces. **Electric Service:**

Electrical power to the Skymark warehouse is 364 KVA – connected load with

480/277-volt 3-phase 600 Amps which is fed by a 100 Amp transformer.

Columns have 50 Amp breaker for welding.

Water Service: **BPU**

Gas Service: **KPL Gas Service**

North Building: 1968 Year Built:

South Building: 1971
